COOLIDGE RARE PLANT GARDENS

ABOUT OUR GARDENS

The Coolidge Rare Plant Gardens were organized for the purpose of specializing in plants out of the ordinary. While we carry a general stock of all kinds of fruiting and ornamental plants, we have many tested and proven novelties that are not generally found in other nurseries. We invite the closest inspection of our stock and grounds with the belief that we can interest you.

We have made a specialty of rare fruiting plants and wish to eall your attention to our list of these fruits, and especially the Avocado, (improperly called Alligator Pear), Feijoa Sellowiana, and Macadamia ternifolia. These three plants possess so much merit that it seems to us no garden is complete without them, and it is a fact that they are engaging the attention of planters from a commercial standpoint.

We expect to grow 25,000 roses the coming year and will have among them all of the best new introductions as well as many of the older favorites. We are making a specialty of our Polyantha or Baby roses. Some of the newer ones are particularly desirable for hedges.

Ferns are among our leading features. We have over 100 varieties of evergreen ferns, all of which are suitable for out-of-door planting in Southern California. We also have close to forty varieties of flowering and foliage begonias. Special rockery plants are another line that we are featuring, and have many desirable ones suitable for this artistic work. We have over twenty-five varieties of bamboos and many varieties of ornamental grasses.

In this brief catalogue, it is our purpose to mention only the rarer and better plants in the different classes, but we can give you the assurance that in our stock you will find practically everything that is desired for the garden, excepting bulbs and seeds, which we do not handle.

LIST OF RARE FRUITS

THE AVOCADO

It may seem to be making a strong statement to say that within the next quarter of a century the Avocado will rank with the orange as a commercial fruit in Southern California. But there is a foundation of fact underlying this statement, and the reasons seem sufficient, indeed, to warrant the belief that it may become even more important.

First, the adaptability of the Avocado to this climate has been proved beyond the possibility of a doubt. There are one hundred or more trees now bearing, ranging in age from three to twenty-five years, scattered over the southern end of the State from the cool sea coast to the hot and dry interior valleys. These trees embrace a number of widely different types, sizes and characters of fruits. This test of adaptability ought to be sufficient to satisfy the most skeptical.

Second, the food value of the fruit is the main basis for the foregoing statement. It presents in a most easily digestible and assimilating form as high as 12 to 18 per cent of fat, which places the fruit in a class with the staple food products, instead of being a mere luxury as is the case with many fruits. The taste for the Avocado is not always acquired upon first trial, but a few repetitions are usually sufficient to make any one extremely fond of it. The price is now prohibitive to most and only a few have had opportunity to acquire the taste, but as the production becomes greater and the price lower, an almost unlimited demand will be created throughout the whole country. Culture of the fruit in the United States will be restricted to limited areas in Southern California and South Florida, and consequently the danger of over-production will be eliminated. As rapidly as price and production will permit, the Avocado will become an important and indispensable part of the daily food of the majority of the people of the United States.

The following budded varieties are all

desirable:

Blake. A green variety, about 6 inches long, conical, of very fine quality; ripening from September to December, prolific bearer, and extremely hardy. \$3.00 to \$5.00.

Fowler. A green fruit, oval-shaped, of the very finest quality. This variety seems to be an almost perpetual bearer. fruits having been picked from the parent tree from April to December. \$3.00 to \$5.00.

Taft Avocado.

This is a fine purple va-Northrup. riety, fruits weighing about three-fourths pound, smooth flesh, without fibre, comparatively small seed and of fine quality. This is also a hardy tree and a prolific and early bearer. We have some fine trees over 3 feet high of this variety. \$3.00 to \$4.00.

This is perhaps the finest variety that has appeared locally. A large, thick-skinned, green variety; weighing from 1 to 11/2 lbs. each; flesh of finest quality and seeds small. Trees 2 to 3 feet. \$5.00.

Dickerson. A thick-skinned type, ripening in April and May; a prolific bearer and vigorous growing tree. \$5.00.

Harman. This is a smooth-skinned green fruit, very prolific, of good quality. Fruits weigh from 1/2 to 3/4 of a pound. \$3.00 to \$5.00.

These are the main tested varieties which we can recommend to all planters

The Blake and Fowler have shown their wonderful hardiness planted in the open without any protection, having endured a temperature of 18 degrees without injury.

FEIJOA SELLOWIANA

In the opinion of a great many fruit experts, this is the most desirable fruit introduction in many years. It was unknown to horticulture prior to 1890, when it was discovered in Uruguay. From there it was taken to France, and from that country it was introduced to California four or five years later.

This is a large ornamental, evergreen shrub, particularly charming when in flower. We consider that as an ornamental alone it should receive the highest consideration, but its real merit also lies in its aromatic fruits, which ripen from November to February. The fruits can be used for every purpose that an vary in size and its few seeds are as apple is used. It makes a beautiful transsmall as fig seeds. The flavor has been parent jelly and of a flavor second to described as a mingling of pineapple, none.

Feijoas. Larger Than a Hen's Egg.

banana and raspberry. It is a fruit which We really feel that too much cannot

A Field of 5000 Feijoas.

be said of the Feijoa, and we confidently predict that it will be planted on thousands of acres for commercial purposes, and surely no home collection of plants is complete without from one to a dozen of them.

Strawberry Guava.

The Feijoa is the hardiest evergreen plant, aside from a conifer, that we know, having withstood a temperature of four degrees above zero in Oregon without injury. It is also extremely drouth resistant. A plant in Santa Barbara, standing on a rocky hillside that has no irrigation or cultivation whatever, fruits regularly. We recommend, however, that the best culture be given it, as it responds, in growth and quality of fruit, to good treatment. A single plant in Pasadena the past year yielded more than 60 pounds of fruit. The only variation that we have noted in varieties, is in regard to size of fruits. The Hehre bears very large fruits, averaging from 2 to 4 inches long, while the ordinary seedlings bear smaller fruit, but all having the same delicious flavor.

We have a fine stock and are prepared to give estimates on 3-year, field-grown plans by the thousand. Single plants 25c to \$2.00.

THE GUAVA

Guava lucidum. This we consider, by all odds, the finest guava yet introduced into California. It is a yellow strawberry guava, immensely prolific and of most delicious flavor. It begins bearing very young and bears two or three crops per year. About the only guava in our collection that escaped serious injury by frost the past winter. Fine plants 35c, 50c, 75c.

Guava araca. Another yellow strawberry guava; fruits very large, ripening late; fine for jellies. \$1.00.

Guava Guinense. The large guava of the tropics. 25c and 50c.

Anona Cherimoya.

Anona cherimoya. Commonly called Custard Apple. A beautiful tree producing large fruits of a delicious custard nature. 25c to \$1.50.

Casimiroa edulis, or White Sapota. A handsome large evergreen tree that produces finely flavored fruits of irregular sizes and shapes. 50c to \$1.50.

Mango Philippensis. A fine large variety of Mango adaptable to sections of little frost, \$1.00.

THE EUGENIA

Eugenia jambos. "Rose Apple." A very pretty evergreen tree, charming in flower and producing fruits about the size of a loquat and of a most pronounced rose fine-leafed, low-growing sort, producing flavor. 50c to \$1.50.

Eugenia jambolana. A larger tree than the above but produces smaller fruits. \$1.00.

Eugenia pitanga. A small evergreen shrub producing a delicious small acid fruit. 50c.

Macadamia Ternifolla.

Eugenia myrtifolia. A beautiful ornamental, tall, narrow tree. The small dark red fruits make good preserves. 25c to \$5.00.

Eugenia Hookeriana. Another very rare Eugenia with foliage similar to above, said to bear a superb fruit. \$1.00.

Eugenia latifolia. An extremely rare variety, similar to above except that the foliage is larger and the fruits are as large as small plums. \$1.00.

Eugenia Ugni. "Chilean Guava." A fine-leafed, low-growing sort, producing a small fruit like a huckleberry; of delicious quality. This plant should be placed in partial shade and be given plenty of water in growing season. \$1.00.

Eugenia apiculata. A very pretty small leafed, compact growing shrub, producing fruits of no particular value but very ornamental. 50c.

MACADAMIA TERNIFOLIA

"Queensland Macadamia ternifolia. Nut." This is a beautiful evergreen tree from Australia that should be in every plant collection in a section where it thrives. It is a good sized tree, of glossy holly-like foliage, showy in flower and producing nuts in clusters of from five to fifty. The nuts are perfectly round, about an inch in diameter, and contain a single white kernel something like a Brazil nut but much more delicate in flavor. The tree is not entirely hardy and we would not advise planting it in sections where the mercury goes below 28 degrees. \$1.00, \$2.50, \$3.50.

Rangoon Lime. This is a very valuable lime unlike any known to the trade. The fruit has the appearance of a tangerine with the same loose skin, but with an intense acid and valuable for the uses that limes or lemons are put to. The tree is very prolific and we are sure that we have here a novelty of great value. \$2.50.

Citrus Limonum. A very dwarf Chinese lemon that we consider one of our most valuable novelties. The fruits are of perfect lemon form but in color are like the richest colored orange. The skin is very smooth and as thin as the paper rind St. Michael orange. The lemons are full of juice of good flavor and the plant is very prolific. We saw a plant in a 6 inch pot about 3 feet high that had on it 24 lemons. Small well rooted plants \$1.00 each.

MISCELLANEOUS FRUITS

Aberia caffra. "Kai Apple." A large thorny shrub producing yellow fruits from 1 to 2 inches, tart and esteemed highly for jams and jellies. 50c to \$1.50.

Ananas sativa. This is the real pineapple of commerce, which in some locations in California will fruit. We have some strong plants in the better varieties.

Carica papaya. A large-leafed, handsome tree producing large melon-like fruits. It is claimed that if the toughest beefsteak be wrapped in the macerated leaves of this plant it will become tender. For frostless locations only. \$1.00.

producing smaller fruits and flowers than the above. 50c to \$1.00.

Carissa grandiflora. A charming evergreen, low-growing shrub producing, for most of the year, chaste white flowers with the odor of the jasmine. The fruit is bright crimson, the size of a small plum, and makes superior jelly and sauces. 50c.

the handsomest trees in cultivation; very showy with its long spikes of scarlet flowers, with seeds resembling chestnuts. The large pinnate foliage looks as though coated with varnish. Fine trees. \$1.00 and \$3.00.

Cocos eriospatha. It is not generally

known, but it is a fact, that some of our beautiful palms produce in abundance a fruit that is quite delicious fresh and that makes very fine jelly. Cocos eriospatha, one of the Australis types, is one of the best of the fruiting sorts. We have no hesitance in recommending this either as an ornamental or fruiting plant. \$2.00 to \$5.00.

Corylus. (Filberts.) We have a number of varieties of the choice English cobnuts which succeed nicely, especially in the coast region. 50c.

Corlyus Americana. The Eastern wild hazelnut. Large plants. 50c.

Carissa acuminata. A small-leafed sort 🖊 Cyphomandra betacea. "Tree Tomato." Very ornamental plant producing good salad fruits. 50c.

> Flacourtia Ramontchi. "Governor's Plum." A very pretty evergreen tree said to produce fairly good fruits. \$1.00.

> Ponderosa lemon. A lemon larger than the largest grapefruit. Good for all ordinary uses of the lemon, or can be eaten as grapefruit. 50c to \$1.50.

Castanospermum australe. "Moreton Rubus ellipticus. A Himalayan ever-Bay Chestnut." Unquestionably one of green raspberry. A desirable subject as an ornamental and also for its fruits, which are delicately flavored yellow colored raspberries. 50c.

> Variegated orange. A very pretty white and green foliaged orange, producing good fruits which are also variegated. \$2.50.

Rare and Ornamental Shrubs and Trees

All of the foregoing list of fruiting plants should also be considered as very fine ornamentals. The following, while not fruit bearing, are among the choicest and rarest extant in California.

Acacias. We have many varieties, including Baileyana, Floribunda, Latifolia, Decurrens, Mollissima, Melanoxylon and others.

Acacia podaliriaefolia. Surely the handsomest of all flowering acacias, \$1.00 and \$1.50.

Acacia pravissima. A charming shrub. 50c to \$1.00.

Alectryon excelsum. A very ornamental tree; rare. \$1.00.

Andromeda Japonica. A beautiful foliaged evergreen for shady situations, producing masses of lily of the valley like flowers. 50c.

Aucuba Japonica. We have several varieties of plain and variegated foliaged Aucubas. Very fine for shady situations. 50c to \$2.50.

Araucaria Cunninghami glauca. A beautiful silvery type of the Norfolk Island pine. Fine trees \$5.00.

Araucaria Bidwilli. We have a fine stock of this beautiful tree from \$1.50 to \$5.00.

Arbutus unedo. "Strawberry Tree." This is a very ornamental tree or large shrub, bearing white bell-like flowers and later covered with myriads of bright crimson fruits that are edible and somewhat resemble strawberries. 50c.

Bauhinia purpurea. A very interesting tree, having butterfly-like leaves and producing charming orchid-like flowers of exquisite fragrance. \$1.00.

Bauhinia Candida. Similar to above, but producing pure white flowers. 50c.

Berberis Darwini. A very pretty small evergreen shrub producing masses of yellow flowers. 25c to \$1.00.

Berberis Wilsoni. A new evergreen Berberis. Very choice. 25c to \$1.00.

Bouvardia. We have, in this charming plant, the red and both the single and double varieties of white and pink; everblooming. 50c to \$1.00.

Buddleya Asiatica. A very fine white flowering tall silvery shrub. Exquisitely fragrant and one of our rarest novelties. 50c to \$1.00.

Buddleya Veitchi. A purple pink variety. 50c to \$1.00.

Carpenteria Californica. This native is one of the real choice flowering evergreen shrubs. A pretty spreading plant producing large waxy white flowers with yellow stamens and of the most exquisite fragrance. It delights in a semi-shady situation. 50c.

Cassia artemisoides. A very early yellow flowering shrub of great beauty. Fine silvery foliage. The best of our winter flowering shrubs. 50c.

Cassia splendida. The most showy of all the yellow flowering shrubs. The individual flower is more than two inches in diameter and borne in immense panicles. Very choice. \$1.00.

Cassia pilifera. A showy orange flowered species. \$1.00.

Ceanothus arboreus. A large leaved stalky plant producing large trusses of beautiful blue flowers. 50c to \$1.00.

Ceanothus cuneatus. Small, glossy leaves and blue flowers. 50c.

Ceanothus... "Glorie de Versailles." One of the handsomest blue flowering shrubs known. 75c.

Ceanothus thyrsiflorus. Handsome large evergreen shrub. Light blue flowers. 25c to \$1.00.

Choisya ternata. One of the best evergreen white flowering shrubs. Almost always in bloom. 50c.

Cistus alba. A pure white sort. 50c.

Cistus maculata. The rock rose. This variety is snowy white with crimson rays in the center. 50c.

Cistus purpurea. A purple variety. 50c.

Colletia Ferox.

Colletia ferox. A very curious plant. Grows into large shapely shrub covered in winter with white bell-like flowers. 50c.

Cornus capitata. This is an evergreen dog-wood, charming when laden with white flowers, but more conspicuous dur-

ing the winter when the tree is completely covered with its large red fruits. \$1.00.

Cotoneaster adpressa. This is one of the most interesting of this extremely valuable family of plants. It veritably creeps along the ground, taking root at every joint, making a wonderful carpet effect for banks or in rockeries. Similar in flowers and fruit to Cotoneaster horizontalis. This is an extremely rare plant and is well worth a place in any collection. \$1.00.

Cotoneaster Francheti. This is one of the largest growing species, making small trees. Similar to the others, it is most conspicuous when covered with its berry-like fruits. \$1.00.

Cotoneaster frigida. A tall growing variety, pretty with its white flowers and very showy during the fall and winter when covered with red berries. \$1.00.

Cotoneaster horizontalis. One of the best of the family. Low growing, perfectly charming in the spring when covered with bright pink flowers, and very noticeable in fall and winter when laden with scarlet berries. 50c.

Cotoneaster microphylla. This is another interesting member of that most interesting family of rockery plants. It is a small leafed, low-growing shrub with pretty white flowers and myriads of pinkish-crimson berries. 50c.

Crataegus crenulata. Too much cannot be said of this beautiful hardy shrub. A true evergreen, withstanding the coldest weather; beautiful in the spring when covered with white flowers, but perfectly stunning throughout the winter, laden with its masses of scarlet berries. 25c and 50c.

Crataegus pyracantha. A beautiful evergreen showing a mass of white flowers in spring, followed by orange-red berries which stay on through the winter. 25c to \$1.00.

Daphne odora. A hardy evergreen shrub producing in the winter and early spring masses of white fragrant flowers. 50c to \$1.50.

Daphne odora variegata. Similar to above except that the foliage is beauti-

fully margined with yellow and the flowers of light pink. These Daphnes are extremely hardy but must be planted in a shady situation. 50c to \$1.50.

Daphniphyllum glaucescens. A fine large variegated leaved shrub for shady situations. \$1.00.

Dendromecon rigidum. This is the California Tree Poppy, a beautiful silvery leaved shrub producing throughout the year masses of bright yellow poppy-like flowers. Very choice and very rare. Strong plants \$1.00.

Duranta Plumieri. "Golden Dewdrop." A splendid shrub producing lovely blue flowers, followed by clusters of golden berries. 50c to \$1.00.

Duranta Plumieri alba. Similar to above, except that it produces pure white flowers. 50c.

Duranta Plumieri variegata. Beautiful yellow and green foliage and blue flowers. 75c.

Eleagnus Simoni. This is an attractive evergreen shrub with peculiar mottled stems and foliage. Fine for rockeries or in the shrubbery. 50c.

Erica melanthera. One of the finest of the heaths which grows into a large shrub. From November to April the plant is a mass of delicate little pink bells. 50c.

Erica persoluta alba. Another very fine heather almost as showy as the former. Flowers are white. 50c.

Escallonia Montevidensis. This is unquestionably the best white variety. Flowers continually in immense clusters of pure white blossoms. \$1.00.

Escallonia rosea. Similar to above except that it bears pink flowers. 50c.

Escallonia rubra. Red flowering sort. 50c and \$1.00.

Escallonia sanguinea. A beautiful red flowering shrub of glossy green leaves. $50\mathrm{c}.$

Eucalyptus linearis. The most beautiful of all eucalyptus trees in foliage. \$1.00 and \$2.00.

Gardenia florida. (The Cape Jasmine.) This is justly appreciated as one of the choicest shrubs in cultivation. Its large waxy white flowers are exquisitely fragrant. 50c.

Grevillea Hilliana. A wonderfully interesting skeleton-leaved plant. 50c to \$2.00

Hydrangea. "Mme. Moulliere." Very large panicles of large, beautiful white flowers. The finest of the new hydrangeas. \$1.00.

Hymenosporum flavum. A beautiful tree, producing quantities of bright yellow flowers. Very fragrant. \$1.00.

Hypericum Henryi. A very pretty up-

Moschosma Riparium.

Grevillea Thelemanniana. Pretty fernlike foliage and coral colored flowers. A continual bloomer. 50c.

Hakea saligna. No collection of ornamentals is complete without this large shrub. All through the year the tips of the leaves are bright dark crimson. 50c and \$1.00.

Heteromeles arbutifolia. Commonly called the California Holly. A very desirable evergreen ornamental that is not seen in our gardens as frequently as it ought to be. 50c and \$1.00.

right growing shrub attaining a height of 6 feet. Flowers perpetually, similar to Hypericum Moserianum. 50c.

Hypericum sp. This is the largest flowering sort. The beautiful yellow flowers often measure 3 inches in diameter. 50c.

Jacaranda mimosaefolia alba. A beautiful white variety of this charming tree. \$1.00.

Jacobinia magnifica. This plant with its waxy begonia-like leaves and spikes of bright crimson flowers is a very attractive garden subject. 50c.

Leptospermum laevigatum. Not exactly a rare plant, but one of the best. This is a beautiful large weeping shrub of grayish green foliage. 25c to \$1.00.

Leptospermum lanigerum. A new one of these choice hardy shrubs. Foliage finer than the above and flowers larger. 50c and \$1.00.

Lyceum Chinense. One of the showiest large shrubs, producing continually thousands of bright scarlet fruits. 50c.

Lotus Jacobeus. A beautiful shrub with grayish-green foliage which bears pea-like flowers of dark, rich brown color. 50c.

Lotus Jacobeus aurea. Like the foregoing, except that it has bright yellow flowers. \$1.00.

Moschosma riparium. A very beautiful winter flowering shrub. Its thousands of white spikes are similar to the Spireaea. Not entirely hardy; should be planted in sections of light frost. 25c.

Mackaya bella. A very fine shrub, producing delicate blue flowers. For shady situations. 50c.

Macrozamia. A charming cycad. The curved and twisted dark green foliage makes it a conspicuous plant in any collection. \$1.00.

Melaleuca linearifolia. A beautiful small-leaved white flowering bottle brush. 50c.

Myrtus communis variegata. This is a very pretty form of the myrtle with beautiful yellow, white and green variegated foliage. Seems to stand the sun without burning. 25c to \$1.50.

Nandina domestica. A very pretty plant growing something like a bamboo. Has showy white flowers and bright crimson berries. 50c.

Olea fragrans. One of the best of our white flowering shrubs. Blooms practically all the time. Very fragrant. \$1.00.

Paratropia. A very pretty Aralia-like plant; large, glossy leaves; fine for vases or garden planting. \$1.00.

Parkinsonia aculeata. One of the the very interesting and beautiful yellow-flowered trees that has not become as common as one might expect. Good plants. \$1.00.

Persea Indica. A beautiful evergreen tree bearing small fruits of no value. \$1.00.

Pinus pinea. Italian stone pine. \$1.50.

Pittosporum phillyraeoides. This is a rare, beautiful weeping tree, resembling a weeping willow, but evergreen and produces sweet-scented cream-colored flowers. \$1.00 to \$3.00.

Pittosporum rhombifolium. One of the best of the family. Largel tree, very pretty in flower and unusually attractive when full of large clusters of golden berries. \$1.60.

Pleroma Splendens.

Pleroma splendens. This is one of our beautiful ornamentals that we have never been able to get a sufficient stock of. As a foliage plant we know of nothing prettier. Its leaves look as if they might have been cut out of bright green velvet. In the earlier stages of its growth the leaves are margined with crimson. The flower, which is from two to three inches in diameter, composed of five petals and very interesting curved stamens, is of an intense royal purple. 50c to \$2.00.

Podacarpus. A very fine Japanese conifer. \$1.00.

Solanum marginatum. A very ornamental, large silvery-leaved plant. 25c to \$1.00.

Sterculia

Solanum Rantonnetti. Deep blue, attractive flowering shrub. 50c.

Solanum pyracanthum. A very striking plant. Its yellow stalks and leaves are covered with myriads of yellow thorns. 50c.

Solanum robustum. A large-leaved, tropical looking plant, growing into a veritable tree. 50c.

Sterculia diversifolia. "Joseph Sexton." This wonderful scarlet flowering tree originated near Santa Barbara. Seems to flower most of the year. \$5.00.

Strobilanthes Dyerianus. Charming purple and bronze foliaged plant. 50c.

Strobilanthes isophyllus. A narrowleaved variety, good for rockeries. Spikes of lilac colored flowers. 25c to \$1.00.

Sutherlandia frutescens. A very pretty shrub with grayish green foliage and bright scarlet flowers followed by most interesting seed pods which are perfect replicas of little ducks. 50c.

Taonabo Japonicum... A wonderfully pretty waxy leaved shrub, very rare. \$1.00.

Thevetia Nereifolia.

Teucrium fruiticosum. A pretty silvery leafed shrub producing light blue flowers in the early spring and summer. Fine for rockeries. 50c.

Teucrium chamoedris. A green foliaged sert similar to above, except that it has bright rose flowers. 50c.

Toxicophlaea spectablis. A very choice bronzy leaved shrub, producing beautiful white flowers of exquisite fragrance. \$1.00

Tristania conferta. A very large, quick growing tree with interesting cream-colored flowers. 50c.

Ulex. This is the old-fashioned English gorse. A very interesting plant, covered in the spring with a mass of yellow flowers. 50c.

Ulmus Chinensis. Evergreen Elm. This is a very rare small-growing tree from China, very beautiful. 50c to \$2.50.

Viburnum macrocephalum. An evergreen snowball of the highest ornamental value. Blossoms nearly all season. 50c and \$1.00.

Rare Deciduous Trees and Shrubs

Albizzia julibrissen. This is a very pretty pink flowering acacia, really one of the showiest flowering trees. A place can well be afforded it, although it is devoid of foliage for two or three months in the year. Fine trees. \$1.00.

Acer Japonicum. We have a number of varieties of the pretty foliaged Japanese Maples from \$1.00 to \$3.00.

Calycanthus floridus. The Florida sweet shrub. The leaves and chocolatecolored flowers are very aromatic. 50c.

Cerasus Japonica. Japanese double-flowering cherry. \$1.00.

Cercis Canadensis. The Judas Tree, Nothing is more showy than this deciduous tree in the early spring when it is literally covered with bright pink buds before the leaves appear. 50c.

Colutea arborescens. The Duck Plant. The seed pods are perfect miniature ducks and the ladies like them to place in the finger-bowls. Very attractive yellow flowers. 75c.

Cydonia Japonica. Japanese flowering quince. 50c.

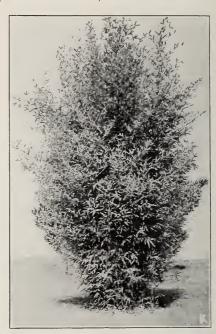

Daubentonia. A very pretty tree with fern-like foliage, producing masses of scarlet Wistaria-like flowers. 50c.

Enkianthus Japonicus. A fine ornamental shrub producing pretty lily of the valley like flowers. Foliage turns bright red in autumn. \$1.00.

Ginkgo biloba. The Maidenhair tree of wonderful foliage. 50c and \$1.00.

Indigofera dosua. One of the indigo plants. Low growing, of fine fern-like

foliage and covered, for most of the spring and summer, with beautiful pink pea-like flowers. \$1.90.

Phyllostachys Nigra. "Black Bamboo."

Koelreuteria paniculata. A very charming tree with fern-like foliage producing masses of yellow flowers. 50c.

Malus purpurea floribunda. This is a very rare and beautiful red flowering

crab-apple. Very ornamental in flower or fruit. A great novelty. \$1.50.

Paulownia imperialis. A large dull leaved tree producing clusters of beautiful purple bell flowers. \$1.00.

Prunus Pissardi Veitchi. This is a purple-leaved plum, producing large double pink flowers. Very choice. \$1.00.

Robinia hispida. The beautiful pink Lotus, more of a shrub than a tree. 50c.

Phyllostachys Castilonis.

Sassafras. A very beautiful and interesting tree. The bark of the root is the commercial sassafras. \$1.00.

Tamarix hispida aestivalis. Surely the handsomest of all the Tamarix. Silvery gray foliage and bright rosy-pink flowers. 50c.

THE BAMBOO

We consider that no landscape is complete without a number of the finer bamboos and grasses. Among the handsomer ones are the following:

Arundinaria falcata. A very fine bright green foliage sort. Best in partial shade. 50c to \$3.00.

Arundinaria Hookeriana. About 20 feet high, dark green foliage. \$1.00 to \$5.00.

Arundinaria Fortunei. A striped-leaved dwarf. Grows about 2 feet high. 50c to \$2.00.

Bambusa argentea. Another very graceful variety. \$1.00 to \$5.00.

Bambusa argentea minor. Similar to above, but with finer foliage and smaller canes. \$1.00 to \$3.00.

Bambusa vulgaris. The Weeping Giant. Very handsome. \$1,50 to \$10.00.

Bambusa vulgaris striata. Similar to above except that the canes are beautifully striped with green. \$2.00 to \$5.00.

Bambusa Alphonse Carri. One of our choice varieties. Fine fern-like foliage and very pretty striped canes. \$1.00 to \$5.00.

Bambusa gracilis. A very fine foliage. \$1.90 to \$5.00.

Bambusa metake. (B. Japonica.) Large leaf. 50c to \$2.00.

Dendrocalamus latiflorus. The straight, tall giant. \$1.50 to \$10.00.

Phyllostachys aurea. The straight-growing one, most common. 50c to \$3.00.

Phyllostachys Castillonis. This is surely a beauty. Most beautiful yellow and green variegated foliage and canes. \$1.50 to \$5.00.

Phyllostachys nigra. The black cane variety. \$1.00 to \$5.00.

Phyliostachys viridi glaucescens. The fish pole bamboo. \$1.00 to \$2.50.

Bamboos are to be among our leading specialties and within another year we expect to have at least 30 varieties to offer.

ORNAMENTAL GRASSES

Carex Japonica. A very ornamental, low-growing, striped grass. 25c.

Cyperus alternifolius. A tall umbrella grass. 35c.

Cyperus nanus. This is the real dwarf umbrella grass, growing only about a foot high. 25c.

Cyperus papyrus. (Papyrus antiquorum.) A stately grass, four to eight feet high. Requires abundance of water. 35c and 50c.

Cyperus Palmatus. A quick low-growing umbrella grass. 35c.

Eulalia gracilis. A very pretty glaucous green grass with white mid-rib, pink blossoms. 25c and 50c.

Eulalia zebrina. Beautiful tall grass with yellow splotches on the blade. 50c.

Festuca Viridis. A very fine tufted grass. 25c.

Festuca glauca. Silvery-gray tufts, fine for borders or rockeries. 25c each, \$2.00 doz.

• Pampas. We have both white and pink varieties. 50c. Bamboo and ornamental grasses are among our specialties.

Panicum plicatum, or Palm Grass. A striking wide fluted-leaved grass that makes pretty specimens. 25c.

Thyrsolanis agrostis. This large Indian grass grows to a height of 10 feet. Its broad green foliage is very tropical in appearance. \$1.00.

Climbing and Trailing Plants

Abutilon Megapotamicum. This is a very interesting variegated climbing species of the flowering maple, so called. 50c.

Acaena microphylla. A charming fernlike vine, fine for rockeries or basket work. 25c.

Ampelopsis Henryi. One of the most beautiful of the family. Rich bluishgreen foliage with a white mid-rib. 25c and 50c.

Ampelopsis sempervirens. A beautiful evergreen vine for covering walls or pergolas. 25c and 50c.

Aristolochia sipho, the Dutchman's Pipe. A very interesting climber. 50c.

Antigonon leptopus. "Rosa de Montana." This is a strong growing vine, producing a mass of pink flowers during the summer. One of our showiest. 50c.

Beaumontia grandiflora. A beautiful strong growing evergreen, producing enormous white, sweet-scented, tubular flowers. \$1.00.

Bignonia Cherere. The finest of the evergreen trumpet vines. Beautiful foliage, large red flowers almost continually in bloom. 50c and 75c.

Bignonia flava. One of the deciduous

trumpet vines, producing large yellow flowers. 50c.

Bignonia Mme. Galen. Another rare deciduous trumpet vine, prolucing bright red flowers. 50c.

Bignonia violacea. One of the finest of the evergreen Bignonias, glossy green foliage, very hardy, producing masses of beautiful violet trumpet flowers. 50c.

Bignonia "Queen of Sheba." This is a wonderfully rampant growing vine, producing large rosy-pink flowers. 50c.

Bignonia McKenni. A strong growing semi-deciduous sort, producing pink flowers. 50c.

Bignonia Tweediana. One of the clinging varieties, producing at the top masses of bright yellow flowers. 25c and 50c.

Bignonia venusta. The well-known winter flowering golden trumpet vine. 50c.

Chorizema ilicifolium. This is a plant with holly leaves producing long racemes of bright scarlet flowers. Quite a free bloomer. 50c.

Cissus rhombifolia. This is a very pretty evergreen vine. Fine for window-boxes, baskets, etc. 25c and 50c.

Dioclea glycinoides. A dainty little climber, producing very pretty crimson flowers like the pea flower. 50c.

Jasmine primulinum. A fine yellow, winter flowering, strong growing plant. 50c.

Lopezia. The Mosquito Plant. This winter flowering trailer is surely rightly named, as the myriads of little delicate pink flowers closely resemble mosquitoes in shape. An extremely beautiful plant. 25c and 50c; \$2.00 per doz.

Polygonum Baldschuanicum. A wonderfully interesting deciduous vine, flowering throughout the summer and producing masses of white feathery flowers. 50c.

Philadelphus sempervirens. This is an evergreen climbing syringa. Flowers like the typical bush syringa, only more fra-

Lopezia. "Mosquito Plant."

Lopezia alba. Similar to above except that its flowers are snowy white. 25c and 50c.

Muehlenbeckia complexa. The Wire Plant. This is sometimes called the Maidenhair fern vine, as it resembles this fern when massed against a wall or trained up. 25c and 50c.

Pithecoctenium muricatum. A stronggrowing vine of the bignonia family. Flowers white with yellow throat, borne in clusters. A consistant bloomer. 50c. grant. A beautiful winter blossoming, rank growing vine. 50c.

Sollya heterophylla. A splendid glossy green, rank growing plant, bearing, for most of the year, light blue bell-like flowers. 50c.

Vitis Capensis. An evergreen grape; one of the finest vines for pergolas and arbors. 25c to \$1.00.

Vitis Baudiniana. Another evergreen grape; strong grower and fine for same purposes as above. 50c.

Choice and Rare Ferns

We consider that no home grounds are properly planted if on the north of the bouse or beneath an artistic pergola or

The, following list will be found very satisfactory in practically all parts of Southern California.

Lastrea Lepida, Nep. Harrisi and Other Ferns.

under some spreading tree a collection of ferns and Begonias, Fuchsias and shade loving plants are not included. We make a specialty of hardy out-of-door ferns. The fern bed can be made with an abundance of rotted strawy manure, which is even better than leaf mould.

Adjantum capillus veneris. This is the hardy native Maidenhair fern and easily grown. From 25c to \$1.00.

Adiantum cuneatum. More of a house fern than for out-of-doors planting. 50c.

Aspidium Tsus-Sumense. A nice dark green, hardy fern. 25c and 50c.

A Fern Nook.

Aspidium Noveboracense. A very fine tall growing sort. 25c and 50c.

Cyrtomium Rochfordianum. The new Holly fern, very distinct and much handsomer than the old one. 50c and \$1.00.

Cyrtomium falcatum. This hardy, showy Holly fern should be in all collections. 50c.

Cyrtomium caryotideum. Large dull green leaved sort and very interesting. 25c and 50c.

Nephrolepsis Elegantissima Compacta.

Cyrtomium Fortunei. An upright growing species, dull green foliage. 25c and 50c.

Fibrous Begonia.

Lastrea aristata variegata. A beautiful fern with gold variegation. 50c.

Lastrea chrysoloba. The new fronds are a wonderfully bronzy green. 50c.

Nephrolepis Anna Foster. An interesting dark green leaved sort. 50c.

Nephrolepis Bostoniensis. The old Boston fern. 25c to \$3.00.

Nephrolepis cordata compacta. The dwarf sword fern. 25c to \$1.00.

Nephrolepis exaltata. The tall sword fern. 25c to \$1.00.

Nephrolepis Harrisi. This is an interesting new species with wavy pinnae. 50ε to \$2.00.

Nephrolepis "Moss Queen." With filmy moss-like fronds. Very interesting. 50c.

Nephrolepis Piersoni. A robust growing sort. 50c to \$1.00.

Nephrolepis Roosevelti. Similar to Harrisi. 50c to \$1.00.

Nephrolepis "Teddy Junior." A very dwarf form of above. 50c and \$1.00.

Nephrolepis Whitmani. One of the standard ferns for house decoration. 25c to \$5.00.

Onychium Japonicum. A very desirable hardy fern for all purposes. Its finely divided fronds make it particularly desirable for bouquets. 15c to 50c.

Polystichum angulare prolifera. Commonly called the lace fern. A beautiful hardy fern. 25c to \$1.00.

Polystichum coreacium. An upright growing hardy species. 50c.

Polystichum plumosum densum. The finest of all the Polystichums. 50c and \$1.00.

Polystichum setosum. The bronzy green foliage shown in a perfect rosette makes it particularly attractive. 50c.

Polystichum "Vase." We have never learned the exact name of this species, but can recommend it as a very interesting sort. Grows in perfect vase shape. 50c.

Pteris Childsi. One of the new Pteris that will always be expensive owing to the fact that it does not produce spores. \$1.00 to \$1.50.

Pteris Cretica. An interesting sort. 25c and 50c.

Pteris Cretica albo lineata. With white variations. 25c and 50c.

Pteris longifolia. A robust dark green foliaged species, very interesting in collections. 50c.

Pteris nobilis. An upright beautiful fern. 50c.

Pteris tremula. A strong, large growing sort. 25c to \$1.00.

Pteris Wimsetti. 25c to 50c.

Pteris Wilsoni. A very interesting tufted species. 15c to 50c.

Scolopendrium vulgare. The ordinary Hart's tongue. 50c.

Scolopendrium undulatum. 50c to \$1.50.

Scolopendrium marginatum. 50c to \$1.00.

Scolopendrium digitatum crestatum. A very interesting sort with its tufted foliage. 15c to \$1.00.

Woodwardia Americana. This is the native tall growing California fern suitable for backgrounds. 35c to \$2.50.

Woodwardia radicans. A glorious drooping leaved fern. 50c to \$2.00.

For fern collections we will supply one dozen 25c ferns, all different, for \$2.00.

This is not at all our complete collection of ferns, but all named can be highly recommended. Any one interested in a collection of ferns can not afford to miss seeing our stock.

Begonias, Saxifrages and Fuchsias. We have a nice line of these shade-loving plants that we can supply at right prices.

We cordially invite plant lovers to visit our grounds at the corner of Colorado street and Hill avenue, in Pasadena, where many little-known and rare specimens of plant life will be found. From Los Angeles take Pasadena electric cars to Colorado street, Pasadena, and transfer to car marked "Lamanda Park"

HARDY PERENNIALS

We specialize in this most interesting family of plants that should be a part of all gardens, and the list offered below we can highly recommend.

Agapanthus albus. Sometimes called the African Lily. Dark evergreen foliage producing spikes of white, sweet scented lily flowers. 50c.

Agapanthus umbellatus. Like the foregoing, except that it produces blue flowers. 50c.

Alpinia nutans. A_i very interesting foliaged plant producing spikes of white and pink flowers that are very showy. 50c.

Agathaea coelestis. This is a charming little blue daisy, always in flower. 15c, \$1.00 per doz.

Anchusa myosotidiflora. A very desirable perpetual blooming plant, flowers very much like deep blue Forget-me-nots. 15c, \$1.50 per doz.

Anchusa "Dropmore." A robust growing sort producing bold spikes of blue flowers. 25c to 50c.

Anemone Japonica. We have in these plants white, pink and red. 25c each, \$2.00 per doz.

Aquilegia or Columbine. Some choice white, blue, yellow and red varieties. \$1.00 per doz.

Aubrietia. A pretty little blue edging plant. 15c, \$1.50 per doz.

Asparagus elongatus. A charming bush evergreen Asparagus that will grow and not burn in the hot, sunny situations. One of the finest greens yet introduced. 25c and 50c.

Asparagus decurrens. A very fine evergreen Asparagus for baskets. 50c.

Asparagus plumosus and Sprengeri. These we have in all sizes, from 15c to \$2.00.

Bilbergia. A very interesting Yuccalike plant throwing up spikes of pink, blue, green and yellow flowers. 50c.

Boltonia. A small white daisy borne in immense panicles growing to a height of 4 feet. 25c.

Campanula. Canterbury Bells. We carry a good line of these interesting plants. \$1.50 per doz.

Cerastium Biebersteini. This is another very fine little border plant. Silverygray foliage and charming little white flowers. 25c, \$2.00 per doz.

Chaenostoma hispidum. A very interesting little border plant producing masses of small white Forget-me-not flowers the whole season. \$1.00 per doz.

Chelone barbata. This is quite a rare perennial that is really very attractive. It seems to blossom most of the year; spikes of bright red flowers. 25c, \$2.00 per doz.

Cuphea ignea. The old Cigar plant. Pretty for baskets and rockeries. 25c, \$2.00 per doz.

: Cuphea Joruliensis. This is one of the most striking of the Cupheas, producing large scarlet and orange flowers. 25c, \$2.00 per doz.

Cuphea llavea. Surely one of the finest of the Cupheas. The flower is a combination of bright crimson and purple, blooms nearly all the year. 25c, \$2.00 per doz.

Cuphea Sp. A wine colored sort. 25c, \$2.00 per doz.

Delphinium. The Perennial Larkspurs, Belladonna, Formosa, Chinese, alba and gold medal hybrids are all desirable varieties. \$1.50 per doz.

Digitalis or Foxglove. \$1.00 per doz.

Doryanthes Palmeri. A wonderfully interesting agave like plant, producing spikes of scarlet flowers. 50c.

Echium. Perhaps one of the most striking biennials known, throwing up a flower spike sometimes 3 to 4 feet high, and almost as big as a stove pipe. 25c.

Eryngium rosaeflorum. The Sea Lavender, 25c.

Eranthemum pulchellum. A plant with coleus-like foliage, producing clusters of the brightest blue flowers in winter. Somewhat tender. 50c.

Gaillardia. Both double and single varieties. 75c per doz.

Geum coccineum. Bright scarlet flowers. 75c per doz.

Geum "Mrs. Bradshaw." This is an im-

provement over the old Geum, producing tall spikes of brightest scarlet flowers sometimes two inches or more in diameter. Very double. 15c, or \$1.50 per doz.

Gypsophila paniculata. No garden is complete without a few clumps of this filmy flower for bouquet making. 15c, \$1.50 per doz.

Gypsophila repens. A very dwarf creeping sort. 25c.

Hedysarum coronarium rosea. An interesting perennial producing masses of bright pink Wistaria-like flowers. 25c, \$2.50 per doz.

Hedysarum album. Like the former, but with white flowers. 25c, \$2.50 per doz.

Heuchera sanguinea. This is a very charming border plant producing spikes of bright crimson flowers. 15c, \$1.00 per doz.

Impatiens Holsti. A low growing plant producing masses of scarlet flowers. 25c.

Impatiens Oliveri. A robust growing plant producing very large flowers of delicate lavender pink. 50c.

Kalanchoe flammea. A sedum-like plant producing spikes of scarlet flowers. 25c.

Lobelia. A nice border or basket plant. \$1.00 per doz.

Mahernia or Honeybell. One of the brightest yellow flowering low growing plants in our collection. 25c.

Marguerite "Mrs. Sander." Large white flowers, very double, resembling Asters. Very floriferous. 75c per doz.

Moraea fimbriata. A very pretty Irislike plant producing tall stalks of beautiful ruffled flowers. 25c.

Moraea iridioides. This very desirable plant is a nice evergreen, everblooming, beautiful white striped with lavender. Iris flowers. 25c.

Iris German. We have a nice line of German Iris. Good strong plants at \$2.00 per doz.

Nierembergia frutescens. A fine hardy fine-leafed evergreen, producing masses of white and violet flowers. 25c.

Nierembergia gracilis. This is a superb flowering plant. Flowers are similar to above but borne through the season in such profusion to almost obscure the plants. 25c.

Nierembergia rivularis. A real low carpet plant, producing white flowers. \$1.00 per doz.

Ophiopogon Japonicum. A small reedlike plant producing spikes of white lily of the valley like flowers. 25c.

Ophiopogon Jaburan argenteum. A silvery variegated Iris-like plant with charming clusters of white bell flowers followed by the brightest of blue berries. 50c.

Ophiopogon Jaburan aureum. A golden variegated sort similar to the last above.

Petunia Hybrida "California Giant." \$1.50 per doz.

Pentstemons. We have a fine line of this desirable hardy plant in separate colors and mixed. 75c per doz. Phlox, Perennial. We have a nice line

Phlox, Perennial. We have a nice line of these desirable plants. \$1.00 per doz. Phygelius Capensis. An interesting

hardy perennial. 25c.

Physostegia alba. One of the choicest of our newer perennials, blooms nearly throughout the season, throwing up long spikes of white bell-like flowers. Beautiful foliage and one of the best of our perennials. 25c, \$2.00 per doz.

Russellia juncea. A very pretty weeping, bright red flowering plant for baskets or rockeries. 25c.

Salvia farinacea. One of the prettiest free blooming, light blue Salvias. 25c.

Salvia leucantha. Makes large handsome clumps, throwing up tall spikes of rich purple flowers tipped with white. 25c.

Salvia Pitcheri. A gorgeous plant, the finest of the blue Salvias. Makes big clumps, throwing up large spikes of most beautiful blue flowers. 50c.

Saxafrage. We carry a good line of these hardy large waxy-leafed plants, very desirable for the fernery or rockery. 25c, \$2.00 per doz.

Shasta Daisy. We have a very large flowered improved sort of this desirable plant. \$1.00 per doz.

Statice. We have a nice line of these interesting lavender flowering plants. 25c.

Thymus variegatus. This pretty variegated form of the old Thyme is charming for edging. \$1.00 per doz.

Sweet William. We aim to carry a nice line of this desirable hardy plant in stock. 75c per doz.

LIST OF ROSES 1914

NEW ROSES

The Coolidge Rare Plant Gardens will always be found in the lead on this most beautiful of all garden plants. We are receiving from Europe and the leading American hybridizers each year the best new roses introduced, and we are sure that you will find here the very choicest of the queen of flowers. The following list introduced within the last three years have all been tested and can be recommended in the very highest terms.

Heinrich Munch. The pink Frau Karl Druschki. This is a wonderful rose and is more beautiful, if anything, than the white. \$1.00.

Mrs. Charles Russell. This wonderful deep rosy pink rose is of the finest substance and unsurpassed fragrance. \$1.00.

Rayon d'Or. The finest yellow yet introduced, but not a strong grower. \$1.00.

Andre Gamon. The brightest cherry red rose yet introduced, with delightful fragrance. \$1.00.

British Queen. A large beautiful white. \$1.00.

SCARCE VARIETIES

Conrad Meyer. A strong growing bush producing enormous soft pink roses of exquisite fragrance.

Dr. J. Campbell Hall. One of the finest of our deep pinks.

Edward Mawley. Unquestionably the

best red rose yet introduced. Very large, deep velvety red, with fine fragrance.

Jonkheer J. L. Mock. Surely a beauty. A very large rose on strong stems, deep pink on the under side and light pink on the upper. Good foliage.

Juliet. One of the new wonderfully colored roses.

Killarney Queen. An improvement over the old Killarney.

Lady Alice Stanley. Another desirable pink.

Lady Hillingdon. One of the finest of the new yellows.

Lyon. Perhaps no rose in the last twenty-five years has received the praise accorded to this wonderful rose. Very large and a beautiful shrimp pink.

Mildred Grant. This very large white rose delicately tinted pink, is surely a wonder. A specimen recently exhibited measured eight inches in diameter.

Mrs. Aaron Ward. One of the proven deep yellow roses.

My Maryland. A very fine fragrant pink rose.

Radiance. A charming large rose of the form of Papa Gontier.

Robert Arthur Waddell. Wonderfully large buds, deep apricot, shaded to crimson

Sunburst. About the best deep yellow yet introduced.

Theresa Fautina. Too much cannot be said of this charming medium-sized rose shading from deep apricot to a soft yellow. Always in bloom.

Wakefield Christie Miller. Another very large beautiful pink rose.

All of the above are good, strong plants. 50c each.

BEST WELL KNOWN VARIETIES

The following are all well tried roses and highly recommended:

Antoine Revoire. A very choice delicate pink.

 $\mbox{{\bf Capt. Hayward.}}\ \ \mbox{{\bf A}}\ \mbox{gorgeous large red}$ rose.

Clara Watson. One of the best light pinks.

Countess of Gosford. The charming light yellow shaded to apricot.

Dean Hole. A very large, fine pink.

Gruss an Teplitz. A glossy red, good garden rose.

Etoile de France. Dark red rose.

Eugene Furst. Almost black.

Florence Pemberton. One of the largest delicate pinks.

Frau Karl Druschki. The finest white

General Jacqueminot. The old standard dark red.

General McArthur. One of the very finest fragrant red roses.

Harry Kirk. A fine yellow.

Hector McKenzie. A large beautiful pink.

His Majesty. One of the fine new reds. Hugh Dickson. A very large red.

Jennie Gillimot. Fine long pointed buds, deep yellow.

J. B. Clark. A very strong growing large red rose.

Kaiserin Augusta Victoria. The old standard white.

 $\begin{array}{ll} \textbf{Killarney.} & A & beautiful & semi-double \\ pink. \end{array}$

La Detroit. A fine pink.

Lady Battersea. Long pointed buds, a beautiful light red.

La France. The old favorite.

Madam Leon Pain. One of the fine new pink roses.

Madam Abel Chatenay. One of the standards in pink roses,

Maman Cochet. Pink.

Maman Cochet. White.

Marquis de Querhont. One of the choicest of the deep apricot high-colored roses.

Paul Neyron. A very large pink rose. Peace. A delicate lemon yellow.

Perle des Jardines. The old standard yellow rose.

President Carnot. A delicate soft pink.

Prince de Bulgaire.

Prince de Bulgaire. A splendid rose, pink, shaded to apricot.

Rhea Reid. A fine red.

Rosalind Or English. One of the finest of our collection of over four hundred varieties of roses. A beautiful glowing pink, fine foliage and a perpetual bloomer.

Soleil d'Or. A deep apricot yellow.

Ulrich Brunner. The standard strong growing red rose.

Viscountess Folkstone. The bush Gainsborough. A very large delicate pink

Wellesley. A new fine pink.

Winnie Davis. One of the good apricot shaded pinks.

All of above 35c each, \$4.00 per doz.

CLIMBING ROSES.

American Pillar. A strong growing rambler. Good foliage, bright single red roses borne in enormous clusters.

Belle Siebrecht. A grand large deep pink.

Birdie Bly. A most charming rosy pink climber, absolutely always in flower. \$1.00.

Climbing Caroline Testout. One of the finest climbers.

Climbing Cecile Brunner. A strong growing type of this beautiful small rose.

Climbing Killarney.

Climbing Papa Gontier. A fine vigorous climbing type of the old favorite.

Climbing White Cochet. A good climbing type of the old favorite.

Climbing White Kaiserin.

Delight. A strong growing single pink rose, flowers borne in immense panicles.

Diabolo. The brightest of single red roses.

Dr. Van Fleet. About the prettiest foliage as well as flowers of any climbing rose known. Beautiful soft pink color.

Gainsborough. One of the very largest delicate pink roses and a strong grower.

La Marque. The old standard white.

Madam Alfred Carrier. A strong growing delicate pink.

Mamie. Similar to Gainsborough but having more apricot in the center.

Mrs. T. B. Crain. Or Pink Henriette. A beautiful pink type of the old favorite. 50c each.

Reine Marie Henriette. The old favorite.

Reve d'Or. About the best climbing rose yet introduced. Buff shaded to deep yellow.

Shower of Gold. Another rose of most beautiful foliage, producing clusters of bright golden small roses.

Striped Marie Henriette. Beautifully striped with light and deep pink.

Tausendschon or Thousand Beauties. One of the finest of the new climbing roses, at the same time will be found clusters of white, pink edged with white and white edged with pink.

Veilchenblau, the Blue Rose. A very strong grower, fine foliage and a wonderfully interesting novelty.

White Cherokee.

William Allen Richardson. A deep yellow climber.

Zepherin Drouatt, the Thornless Beauty. We cannot say too much in favor of this marvelously deep pink rose, absolutely thornless. A good grower, fine foliage, and roses of exquisite fragrance. 50c and \$1.00.

All of above 35c and 50c, except where noted.

POLYANTHA ROSES.

We are sure that the merits of this class of showy small roses has never received the attention at the hands of Nurserymen that they should. Believing that no collection of roses is at all complete without some of them, we are growing them in large quantities. All of the following have been tested and we are sure you will be pleased with them:

Bordure. A dainty little pink rose borne in enormous panicles.

Cecile Brunner. Too well known for description.

Erna Teschendorf. The finest red of the little Polyanthas.

Eugenie Lamesch. A bright yellow baby rose.

Jessie. A small bright red rose, borne in immense panicles.

Leone Lamesch. A wonderfully variegated rose, flowers shaded from yellow to scarlet.

Maman Turbat. One of the most charming pink baby roses yet introduced; in fact, it is a miniature Caroline Testout, borne in immense panicles.

Orleans. A deep pink single rose with a white eye, borne in large clusters.

Phyllis. A charming rosy pink.

Tausendschon, Baby. Similar to the climbing type, but perpetual flowering.

White Cecile Brunner. A pure write type of the above.

Yvonne Rabier. A charming white.

New and Little Known Plants

We have at present more than thirty varieties of these Polyantha Roses, many of them being introduced as late as 1914, which we will offer later after testing. In the foregoing list of roses we have not attempted to include all of the varieties we carry in stock, but we can recommend all of those named and make this positive guarantee that any rose purchased from us on our recommendation and not found satisfactory will be replaced with any two that the purchaser may select from our collection. Within another year we expect to offer a number of our own hybrids that we are sure possess merits equal to any.

In this brief catalogue we have not assumed to enumerate all of the plants we carry in stock, but we wish to impress on all that it is our constant endeavor to not only be the leaders in new plants and plant novelties, but to carry all of the commoner plants that have demonstrated their adaptability to our climate. The feeling in California is that only evergreen plants should be found in our gardens, but believing this a mistake and that people will sooner or later mix with other shrubbery many of our deciduous flowering and ornamental trees and shrubs, we are getting quite a collection of them, including Deutzia, Weigela, Philadelphus, Lilacs, Halesia, Hawthorn, Gleditschia, Laburnum and many others.

We also carry a full line of citrus trees, including Navel, Valencia and

other oranges, Tangerines, Kumquats, Lemons and Grapefruit. From January to March a full line of the better varieties of deciduous fruits, including Peaches, Pears, Plums, Apricots, Prunes, Nectarines, Almonds, Quinces, Walnuts, Persimmons, Figs, Apples, Crab Apples, Grapes, Berries, etc.

We are also specializing in hedge plants, including Myrtus Communis, Myrtus Microphylla, Myrtus Communis Variegata, Laurustinus, California Privet, Golden Privet, Rosemarinus, Crataegus and many other useful plants for this purpose.

From September to March we have a fine line of best Pansies, Stocks, Snapdragons and other plants.

For summer planting we aim to carry a fine selection of Asters, Cosmos and other plants.

We wish to state that at our Nurseries at the present time are over a quarter of a million growing plants of various kinds, so we can assure any plant lover that a visit will well repay him. We thank the public generally for the appreciation they have shown our efforts to enlarge the already large list of ornamentals found in our vicinity, and assure all that our motto is "To please," and that any plant bought from us and not found up to representation or in any way unsatisfactory, the money will be cheerfully refunded. "WATCH US GROW."
